Srikar Kodati asked a question in **Data Science - R & Python**.
2h · 🌐

Hello. Does anyone know a simpler way of filtering a dataframe using multiple columns.

I am doing this:
`x = p[p[99] == 26][p[98] == 5][p[97] == 9][p[96] == 20][p[95] == 14][p[94] == 22][p[93] == 11][p[92] == 21][p[91] == 6]...` See More
